You can take photos, record videos and more. The configuration of the entire application is very simple and everyone can easily find the right mode for their needs. Download Cyberlink YouCam 3.30.0.3-Windows How to utilize YouCam to take photos and record videos using a webcam or digital camera Getting started Once the webcam application is installed, you can use it to have fun with the camera feed, record videos and take photos. This section will guide you through the basic steps of using YouCam. Open the application By opening the YouCam window, you should be directed to the main webcam screen, while the settings panel should be available just beneath it. Launch a video recording session YouCam can be used to record videos and take photos, but you can also launch a video recording session. The process starts with entering the mode you need and the type of video you want to create. Be careful with your settings While recording videos, it is very important to be careful with the settings. For instance, if you set the recording resolution at a low level, then the resolution of the final video file is going to be lower. In addition, recording videos at a very high framerate is going to affect the overall quality. Search the webcam For the best results, you should also make sure that you are using a webcam that has a live feed. This way, you will see changes reflected on the screen before anything is recorded. If you are unsure, you can check the latest firmware of your webcam to be sure. Customize the webcam feed If you are not happy with the virtual object appearing on your webcam feed, you can move or delete it. To do this, head to the items submenu, and you should see a list of items, including the virtual objects, frame, mirror, your webcam image and a record mode. Edit the webcam image The webcam program is able to enhance the webcam image with photo effects. By default, you will find 20 photo filters at the

Slight menu jumping. Share features are good Features are limited in the version I have. Bad Start-up apps blocked after installing webcam app. Other 3,5Good Date uploaded: May 13, 2012 Date downloaded: May 19, 2012 www.youtube.com/watch?v=auYRtce5V60 I like that I can add my facebook account and others so I can post to my facebook wall or to the friends that I have added. I like that I can tell it to use motion only or both audio and video. The quality of the video is good but it is to do with the type of camera that I have as I am using that camera at the moment. I have the Logitech c920 webcam. I also like that when I connect to my pc it is always on the top right hand corner and I can bring it back from there. I like the settings that are on the right hand side and I also like that I can move it around the screen. My webcam also works with CamStudio good in this version. Overall I like it Installation Easy to follow installer. YouCam Program File The program file that you get from the installer is a.Zip file. Usually all the programs that you get in such a file are compressed into one file. So it is essential to decompress such files. YouCam Program Files You have two main programs with YouCam. 1.) YouCam 2.) YouCam MSX YouCam MSX Just go to the program file you downloaded and you have 2 programs there. Default Program for Linux Download YouCam 1.1.5 for Linux. They are extracted. We don't use a GUI application for Linux. We have to use the command line.

System Requirements:

Broadcast is the only show that can put on a show like no other. Just like a boxing match, we have to put on our own show. Your support is what allows us to bring a show like this to the masses. Without your support we would not be able to put on this event. In order to meet the expectations of you, we need to make sure your PC is powerful enough to run the show and the latest edition of the show. This is to ensure you get the best show. Without your support it would be impossible to create a show like this. I
