"The game is relentless and reacts dynamically to real human skill to bring the authenticity we've been hoping for since the day it was announced," said David Rutter, Executive Producer on FIFA. "We've worked diligently with our quality partners to bring you FIFA 22 on Xbox One and PlayStation 4 and we are pleased to announce it is coming your way this fall." The true to life EASIEST AI EVER FIFA 22 introduces the most advanced, intelligent and responsive AI ever on consoles. With the most intuitive and nuanced control scheme in franchise history, a new in-game Tutorial and introduction guide, and a restructured Momentum Engine, FIFA 22 is the most naturally flowing, adaptive and unpredictable game-playing experience on consoles. The new Tutorial feature helps players quickly learn the in-game controls while giving them accurate feedback on how to play the game. Now you can start and stop a match at anytime, play the game in offline mode anywhere, practice new game-changing skills like the new Formation Switch and press a button to 'role-back' the field. In addition to these new features, FIFA 22 introduces real-time AI evolution and controls to ensure that the most human-like and natural gameplay experience can be enjoyed by any player. On top of that, it's the easiest AI you'll ever experience to use. This is the most natural and adaptive AI in the franchise's history. FIFA 22 also introduces advanced dribbling controls and new celebrations that feature all the personality you expect from FIFA. The Dribbling System now detects the direction of the ball to automatically aim your shot or set up. You no longer have to click the "A" button to start your free kicks. The new Control Stick and new in-game options allow full control of both the ball and the player. You can move the player's body in any direction and can slide controls to the left or right, or position them on the spot. Intelligent Corner Kick Assist FIFA 22 introduces a new corner kick system that uses AI intelligence to guide your player's run-up, positioning and shot selection to improve accuracy and execution. Players now have a target area where the AI drives the player to chase the ball and makes a decision on where to shoot the ball based on where the shot is going. This is an evolution of the Real Chance Indicator (RCI)
